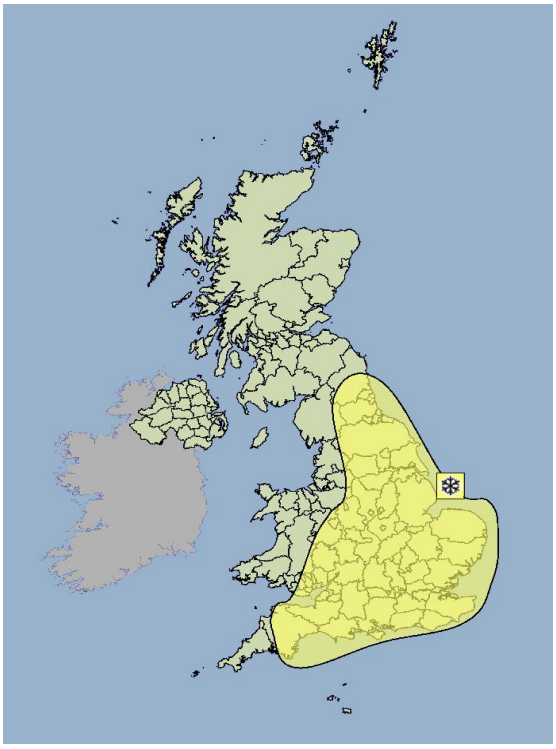
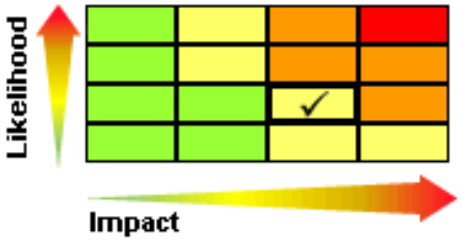
National Severe Weather Warning Service





Chief Forecasters Assessment
Not all places will see snow showers, but where they do form locally 1-3 cm of snow is possible in places. Furthermore, showers may become organised into bands at times resulting in locally around 5 cm accumulating, with this most likely near the Thames Estuary and the Wash. Some melting of lying snow is expected during the middle of the day.

Should the small chance of a more organised band of snow affecting the southern and south eastern regions come into fruition, a more widespread 2-5 cm could be possible here, with some low level areas seeing 10 cm. High ground could see locally 10-20 cm.

Some isolated ice patches may form where run off from saturated fields freezes overnight.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **00:05 on Sun, 18th Mar 2018** until **23:55 on Sun, 18th Mar 2018**

Snow showers are likely to continue throughout Sunday, and where these converge some snow may well accumulate and could then prove disruptive. There is a small chance that snow may fall for a longer period across southern, and particularly south eastern regions for a time on Sunday.

There is a chance of travel delays on roads with some stranded vehicles, along with delayed or cancelled rail and air travel. There is a chance that power cuts will occur and services, such as mobile phone, may be affected. There is a small chance that some rural communities could become cut off.
